PROFILE

Motivated Computer Science graduate with hands-on experience in Laravel and web development. Skilled in applying theoretical knowledge to practical projects, eager to deepen expertise and contribute to a dynamic team. Passionate about learning and growing in web development.

EDUCATION

Faculty of Computers and Artificial Intelligence, Damietta University, *Bachelor's degree in Computer Science , Very Good , GPA: 3.03*   Jan 2021 – Jun 2024

PROFESSIONAL EXPERIENCE

Backend developer, *Reach Agency*   Aug 2024 – present | New Damietta

- Developed and maintained a GYM management system with features such as memberships, session management, user authentication, support messages, coupons, user measurements, and a comprehensive admin dashboard for CRUD operations.
- Built a simple e-commerce furniture website showcasing products and categories, including an admin dashboard for managing categories, products, and multiple image uploads. implemented product filtering, search endpoints, and dashboard statistics to enhance functionality and user experience. ⧉
- Developed and deployed a complete admin dashboard using Laravel and Filament for managing company content and operations. ⧉
  - Built modules for **Services**, **Projects**, **Team Members**, **Blog Posts**, **Clients**, **Job Board**, **Job Applications** (with CV upload), **Email Subscriptions**, and **Contact Messages**.
  - Integrated **SMTP** protocol for sending newsletters and job updates to subscribers.
  - Designed and implemented **Filament dashboard widgets** to display key statistics in real-time.
  - Built a **RESTful API** for all functionalities to integrate seamlessly with the **Next.js React frontend**.
  - Deployed the project on a **Hostinger VPS**, configured **NGINX**, **SSL**, and implemented **CI/CD** using **GitHub Actions** for automatic deployment on every push.
  - Ensured high scalability, clean architecture, and maintainable code following best Laravel practices.

PROJECTS

Tasks API, *PHP, Laravel, API, Sanctum* ⧉

Developed a **Task Management API** using PHP and Laravel, incorporating authentication with Sanctum. The project included CRUD functionality for tasks and categories, user authentication and authorization, and RESTful API development. Designed scalable controllers, models, and routes to ensure efficient backend operations.

Food Ordering System, *HTML, CSS, Bootstrap, PHP, MySQL, Laravel* ⧉

This project consists of many pages which the home page contains foods with its price and users cannot make order without signin. admin can add and delete or edit foods and Categories. orders appear in admin panel which only admin can approve for users orders or reject.

Blog Website, *HTML, CSS, PHP, MySQL, Laravel, REST API* ⧉

In this project i make all CRUD operation using laravel. which only authorized users can create , edit and delete posts . i used laravel Breeze for authentication, and make Restful API & documentaion.

SKILLS

- HTML
- CSS
- PHP
- OOP
- MySQL
- MVC
- Laravel
- JavaScript
- Bootstrap
- RESTful API
- Livewire
- Git & GitHub
- Python
- Django
- Wordpress
- Vibe Coding

COURSES & CERTIFICATES

Introduction to Databases for Back-End Development, *Coursera* ⧉

Technical Support Fundamentals, *Coursera* ⧉

Computer Networks Fundemental from Maharah Tech, *Maharah Tech* ⧉

TRAINING

Artificial intelligence (AI) summer training course from NTI 2021 - 4 weeks ⧉

PHP Backend internship from Instant company 2022 - 3 weeks

Wordpress Training from Orgwani 2025 - 4 weeks

LANGUAGES

- Arabic
- English
